Betreft: Statement on GPS Usage

Dear reader,

This statement explains how GPS data of employees using Secusoft via the app or browser is stored.

We declare that Secusoft **only** stores GPS data for the following functionalities:

- Registering the start and end of a shift.
- Registering/scanning a QR code.
- Registering/scanning an NFC tag.
- Confirming an hourly report.
- Handling a task during a mobile surveillance duty.
- For various reports, only when you manually click "Retrieve GPS location."

If the GPS location is successfully retrieved, the coordinates or a notification will be displayed on the screen. When our software is expanded, employees will receive a notification when retrieving GPS data, as is currently standard practice.

Additional clarifications: Secusoft does not store GPS data without it being visible.

- GPS data is **not** retrieved if the employee is not logged in.
- GPS is **not** retrieved in the background by the app or browser.
- GPS is **not** collected for every action, only for the specific functions listed above.

We declare that Secusoft meets the highest security standards for data storage and operates with PCI-DSS certified servers in an ISO 27001, ISO 27701, ISO 9001 and ISO 14001 certified environment. Secusoft complies with all privacy legislation requirements and does not share any data with third parties.

For any questions, please contact us by email at support@secusoft.com or by phone at +31 85 1300760.

Kind regards,

Leo Hoogma
General Director
